

I recently switched to satellite radio because I was so disheartened over the radio stations being so controlled. I reserve the right to listen to whatever I want to hear and see no reason that now, using a private source, that the NAB try to regulate that as well. Censorship belongs in the past. This is now the 21st century and we deserve a choice. The NAB has proposed to take away weather and traffic? Why, and what right do they have. With personal subscribers that listen, we have the right to listen to anything that does not break any federal or state laws. I am a law abiding citizen of the United States of America and see no reason that I can not have this as a service that I am paying for. Thank you for your time and I do hope that you do put this into consideration.

Thank you,

Tanya Doptis
